ACTUAL
DESIGN

SQUARE CONDUCTOR PIPE

A NEW CONCEPT IN DOWNSPOUT DESIGN & PERFORMANCE

It's a great new idea: square conductor pipe and elbows, rather than rectangular. They're more efficient, more versatile, more economical and time-saving.

- INCREASES WATER FLOW
- NEEDS ONLY ONE TYPE ELBOW
- SLASHES YOUR INVENTORY NEEDS
- ECONOMICAL & TIME SAVING

With the new Flo Mor, you don't have to stock both A and B elbows. Just one type meets all needs, cutting your inventory requirements drastically. What's more, this new configuration handles a greater flow-through of rainwater, compared to conventional pipe and elbows. Easily connects to 4", 5" or 6" gutter.
